DOCUMENTATION REQUIREMENTS

The GM Dealer or Independent Service Center must be furnished with the purchaser's original repair order or sales slip (or dealer's photocopy) showing vehicle identification number, installation date, and mileage. This warranty is transferable to subsequent owners, free of charge, by providing the above required documents to any purchaser of the vehicle in which the assembly/component was originally installed.

OBTAINING REPAIRS

GM Dealer Installation: The GM Dealer or Independent Service Center must be furnished with the purchaser's original repair order or sales slip (or dealer's photocopy) showing vehicle identification number, installation date, and mileage. This warranty is transferable to subsequent owners, free of charge, by providing the above required documents to any purchaser of the vehicle in which the assembly/component was originally installed.

Independent Service Center Installation: The Independent Service Center (ISC) that installed the assembly/component or any GM Dealer may perform repairs. Before any repairs can be performed under warranty by an Independent Service Center, the selling GM Dealer (or any GM Dealer) must first authorize needed repairs as a sublet service.

Towing:* For GM Genuine Parts Engine, Transmission, and Transfer Case assemblies, towing will be covered to the nearest GM Dealership or ISC that performed the installation, not to exceed \$150.00, under the following conditions:

- The vehicle is inoperative
- The failure was the result of the unit; not the installation

Emergency Repairs (GM Dealers Only): Reimbursement to an owner for repairs performed by other than a GM Dealer will be considered when GM Dealer service was not available (e.g., weekends, evenings, etc.) or when repairs were made in a foreign country where warranty repairs by a GM Dealer are difficult to obtain.

*Chevrolet Performance Engines and Transmissions are excluded.

The parts listed in this catalog are intended primarily for use in racing, track applications, or “off-road” vehicles— they are not intended for use on public roads. U.S. federal law prohibits an automobile manufacturer or dealer from removing, modifying, or rendering inoperative any part installed in compliance with an applicable Federal Motor Vehicle Safety Standard on a motor vehicle used on public roads.

Many parts intended for use on private property, including racing on a track, are not designed or tested for crashworthiness or to meet safety standards applicable to public-road use, and may adversely affect the original intended performance or handling characteristics of the vehicle. These parts are designed and intended to be used with experts supervising their installation and use, to help assure the proper and safe operation of the vehicle.

Vehicles equipped with Chevrolet Performance parts also may not meet U.S. federal, state, or local emissions laws, regulations, or ordinances, and may not be operated on public roads, streets, or highways or for non-competition purposes. Further, the federal government and many states and provinces have enacted laws with various penalties for tampering with or otherwise modifying any required emissions or noise-control system. Chevrolet Performance customers are responsible for ensuring their use of Chevrolet Performance parts complies with applicable federal, state, and local laws, regulations, and ordinances.
